

DIVING FOR SCIENCE AND ARCHAEOLOGY

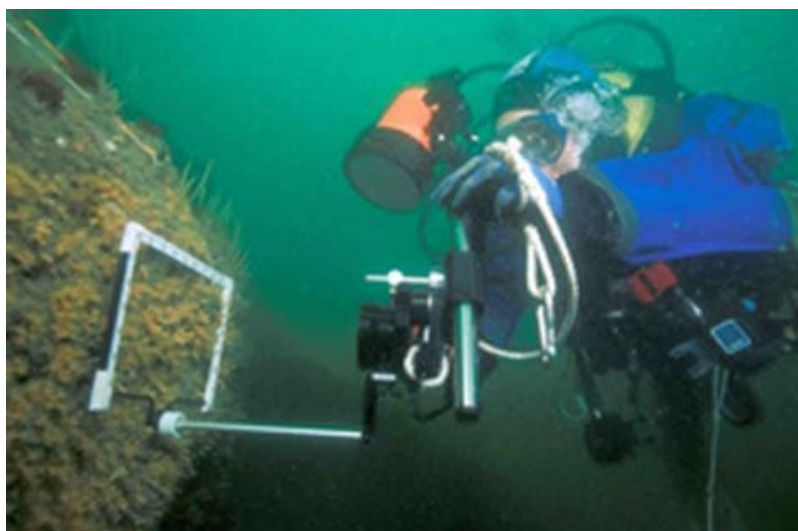

PROGRAMME AND REGISTRATION FORM

“An international conference to showcase the importance of diving as a research tool”

**21 - 22 March 2006
Waterfront Rooms 3 & 4
ExCel, London**

In conjunction with Oceanology International 2006

For decades, diving has allowed scientists and archaeologists to study their subjects underwater. During this time, diving as a research tool has made a significant contribution to many scientific and archaeological projects. Because of the diversity of subject areas that diving supports, much of its contribution becomes diluted in the general literature. Therefore, the aim of this conference is to highlight the importance of diving to science and archaeology by providing a forum for the rich and varied outputs of underwater research.
