## 2007 - A Year of New Industry Records

### Thursday 22 November 2007

Lectures 18.00 hrs      Cheese & Wine 19.30

Pippard Lecture Theatre, Level 5, Sherfield Building, Imperial College of Science, Technology & Medicine,  
Exhibition Road, South Kensington, London SW7 (behind the Science Museum)

Prepared by SUT's Subsea Engineering and Operations Committee and presented by its Chairman,  
Mr Richard Luff of Stingray Geophysical Ltd.

Chairman: Jim Cattanach, Intec Engineering

After a relatively slow but steady progression of incremental increases over the past few years, 2007 has seen some rapid and major extensions to the limits and boundaries of offshore technology. New records have been set for both the world's deepest and longest subsea tie-backs, the deepest floating production facility and the biggest subsea-to-beach development. Announcements have also been made and projects sanctioned that will extend these ranges still further in the next three years.

Because we are often so involved in our immediate workloads and projects, we are not always fully aware of many of the other activities that are being undertaken across the industry. The aim of this presentation is to rectify this situation, by reviewing a number of the "World Firsts" that have been achieved this year. Many of these are accompanied by project videos and animations that have been produced by the field operators to highlight these records.

This presentation will be informative, interesting and very enjoyable.
